

Workpackage WP D: Dissemination

Lead: BfR

The aim of this work package attends to the dissemination of the knowledge and results obtained during the project. During the experimental investigations, an exchange between scientists will be conducted. They shall be trained within the experimental or analytical techniques conducted at the collaborated institutes to get a transfer of knowledge between institutes and countries. Besides an internal training, an external training for students is also planned. A further aim of the WP is the organization of a public workshop attending to the topic of fate and effects of aerosolized MNM under the influence of surface active substances on human health.
